N0473S 004130815081

## N0473S

**125-250 gel lanes (1.25 ml) Lot: 0041308**  
**100 µg/ml Store at 4°C Exp: 8/15**

**Description:** Quick-Load® 50 bp DNA Ladder is a pre-mixed, ready-to-load molecular weight marker containing bromophenol blue as a tracking dye.

The DNA Ladder consists of proprietary plasmids which are digested to completion with appropriate restriction enzymes to yield 17 bands suitable for use as molecular weight standards for agarose gel electrophoresis. The digested DNA includes

**Ready-to-load, Stable at 25°C**

fragments ranging from 50–1,350 base pairs. The 200 and 500 base pair bands have increased intensity to serve as reference points.

Supplied in: 2.5% Ficoll-400, 11 mM EDTA, 3.3 mM Tris-HCl (pH 8.0 @ 25°C), 0.017% SDS and 0.015% bromophenol blue.

**Usage Recommendation: We recommend loading 5–10 µl (0.5–1.0 µg) of Quick-Load 50 bp DNA Ladder per gel lane.** The Quick-Load 50 bp DNA Ladder is not intended for precise quantification of DNA mass but can be used for approximating the mass of DNA in comparably intense samples of similar size. The approximate mass of DNA in each of the bands in our Quick-Load 50 bp DNA Ladder is indicated assuming a 10 µl (1.0 µg) load.

*Quick-Load 50 bp DNA Ladder visualized by ethidium bromide staining on a 1.8% TBE agarose gel. Mass values are for 1 µg/lane.*

Fragment	Base Pairs	DNA Mass
1	1,350	103 ng
2	916	70 ng
3	766	58 ng
4	700	54 ng
5	650	50 ng
6	600	46 ng
7	550	42 ng
8	<b>500</b>	<b>76 ng</b>
9	450	34 ng
10	400	31 ng
