S6654S

50 µl **Lot: 0141202**
Store at -20°C **Exp: 2/13**

Description: Serum from rabbits immunized with a peptide derived from *Bacillus circulans* chitin binding domain. Store at -20°C.

Specificity: Tested by Western blot analysis. Reacts specifically with the *Bacillus circulans* chitin binding domain protein.

Suggested Working Dilution: 1:5000

Performance: In a Western blot, a dilution of 1:5000 gives a strong signal when used to detect fusion proteins containing the chitin binding domain.

Chitin Binding Domain = 5 kDa

Fusion Protein = Size of your target protein +
Intein/Chitin binding domain.
