Assay Name/Specification (minimum release criteria)

Functional Testing (Targeted DNA Library Construction) - Each set of reagents is functionally validated together through construction and sequencing of a target enriched DNA library on an Illumina® Sequencing platform. For 100 ng of Human Genomic DNA input and an average coverage of 100X, 100% of the targets are covered.

* Individual Product Component Note - Standard Quality Control Tests are performed for each component included in NEBNext Direct® BRCA1/BRCA2 Panel and meet the designated specifications.
