* Individual Product Component Note	Pass
Standard Quality Control Tests are performed for each component included in NEBNext®	
End Repair Module and meet the designated specifications.	
Functional Testing (Library Construction, DNA Modules)	Pass
Each set of reagents is functionally validated and compared to a previous lot	
through construction of DNA libraries. Libraries made from previous and current lots	
for the recommended input DNA amounts are sequenced together on the same Illumina®	
flow cell and compared across various metrics including library yield, fraction of	
reads aligning to the reference, GC bias, and insert size.	

This product has been tested and shown to be in compliance with all specifications.
