## New England Biolabs Certificate of Analysis

Product Name:	Amylose Resin
Catalog Number:	E8021S
Lot Number:	10025025
Expiration Date:	09/2021
Storage Temperature:	4°C
Specification Version:	PS-E8021S/L v1.0

Amylose Resin Component List			
NEB Part Number	Component Description	Lot Number	Individual QC Result
E8021SVIAL	Amylose Resin	10016540	Pass

Assay Name/Specification	Lot # 10025025
<b>Functional Binding Assay (Resin Binding Capacity)</b> Amylose Resin (1 ml) was packed into a column and equilibrated with column buffer. Crude extract from E. coli containing a plasmid that expresses a MBP5*-paramyosin $\Delta$ Sal fusion protein (8 ml) was then passed through the column at 25°C, then washed with column buffer and the target protein eluted with 4 ml of column buffer containing 10 mM maltose. Binding capacity was determined to be >4 mg MBP5*-paramyosin $\Delta$ Sal /ml of resin based on A280 of the eluate.	Pass
Functional Binding Assay (Resin Binding Specificity) Amylose Resin (1 ml) was packed into a column and equilibrated with column buffer. Crude extract from E. coli containing a plasmid that expresses a MBP5*-paramyosin∆Sal fusion protein (8 ml) was then passed through the column at 25°C, and then washed with column buffer. The target protein was eluted with 4 ml of column buffer containing 10 mM maltose. SDS-PAGE of the eluate on a 10-20% Tris-Glycine gel confirms low non-specific binding of extract proteins and high isolation of target.	Pass

This product has been tested and shown to be in compliance with all specifications.
