New England Biolabs Certificate of Analysis

Product Name: Amylose Resin High Flow

Catalog Number: E8022L
Lot Number: 10031641
Expiration Date: 01/2022
Storage Temperature: 4°C

Specification Version: PS-E8022S/L v1.0

Amylose Resin High Flow Component List			
NEB Part Number	Component Description	Lot Number	Individual QC Result
E8022LVIAL	Amylose Resin High Flow	10027734	Pass

Assay Name/Specification	Lot # 10031641
Functional Binding Assay (Resin Binding Capacity)	Pass
Amylose Resin High Flow (1 ml) was packed into a column and equilibrated with	
column buffer. Crude extract from E. coli containing a plasmid that expresses a	
MBP5*-paramyosin Δ Sal fusion protein (8 ml) was then passed through the column at	
25°C, then washed with column buffer and the target protein eluted with 4 ml of	
column buffer containing 10 mM maltose. Binding capacity was determined to be >4 mg	
MBP5*-paramyosinΔSal /ml of resin based on A280 of the eluate.	
Functional Binding Assay (Resin Binding Specificity)	Pass
Amylose Resin High Flow (1 ml) was packed into a column and equilibrated with	
column buffer. Crude extract from E. coli containing a plasmid that expresses a	
MBP5*-paramyosinΔSal fusion protein (8 ml) was then passed through the column at	
25°C, and then washed with column buffer. The target protein was eluted with 4 ml of	
column buffer containing 10 mM maltose. SDS-PAGE of the eluate on a 10-20%	
Tris-Glycine gel confirms low non-specific binding of extract proteins and high	
solation of target.	

This product has been tested and shown to be in compliance with all specifications.
