

New England Biolabs Certificate of Analysis

Product Name: *Chitin Magnetic Beads*
 Catalog Number: *E8036S*
 Packaging Lot Number: *10167484*
 Expiration Date: *11/2025*
 Storage Temperature: *4°C*
 Specification Version: *PS-E8036S/L v1.0*

Chitin Magnetic Beads Component List			
NEB Part Number	Component Description	Lot Number	Individual QC Result
E8036SVIAL	Chitin Magnetic Beads	10167483	Pass

Assay Name/Specification	Lot # 10167484
<p>Binding Capacity (Magnetic Beads) Chitin Magnetic Beads (25 µl) were equilibrated and incubated with 500 µl of crude extract from E. coli containing a plasmid that expresses a SNAP-intein-chitin binding domain fusion protein for 1 hour at 25°C, then washed and the intein cleaved and target eluted. Binding capacity was determined to be >2 mg of target protein per ml of bed volume.</p>	Pass
<p>Functional Binding Assay (Qualitative) Chitin Magnetic Beads (25 µl) were equilibrated and incubated with 500 µl of crude extract from E. coli containing a plasmid that expresses a SNAP-intein-chitin binding domain fusion protein for 1 hour at 25°C, then washed, eluted and evaluated by Tris-Glycine gel to confirm low non-specific binding of extract proteins and high isolation of target.</p>	Pass

This product has been tested and shown to be in compliance with all specifications.
