## New England Biolabs Certificate of Analysis

Product Name: Clal
Catalog Number: R0197S
Concentration: 10,000 U/ml

Unit Definition: One unit is defined as the amount of enzyme required to digest 1 μg

of Lambda DNA (dam-) in 1 hour at 37°C in a total reaction volume of

50 μl.

Lot Number: 10041800
Expiration Date: 04/2021
Storage Temperature: -20°C

Storage Conditions: 50 mM KCl, 10 mM Tris-HCl (pH 7.4), 1 mM DTT, 0.1 mM EDTA, 50%

Glycerol, 200 µg/ml BSA

Specification Version: PS-R0197S/L v1.0

| Assay Name/Specification                                                                                                                                        | Lot # 10041800 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Endonuclease Activity (Nicking)                                                                                                                                 | Pass           |
| A 50 µl reaction in CutSmart™ Buffer containing 1 µg of supercoiled PhiX174 DNA and a minimum of 30 Units of Clal incubated for 4 hours at 37°C results in <10% |                |
| conversion to the nicked form as determined by agarose gel electrophoresis.                                                                                     |                |
| Exonuclease Activity (Radioactivity Release)                                                                                                                    | Pass           |
| A 50 µl reaction in CutSmart™ Buffer containing 1 µg of a mixture of single and                                                                                 |                |
| double-stranded [ ³H] E. coli DNA and a minimum of 100 units of Clal incubated for 4 hours at 37°C releases <0.1% of the total radioactivity.                   |                |
| Ligation and Recutting (Terminal Integrity)                                                                                                                     | Pass           |
| After a 10-fold over-digestion of Lambda dam- DNA with Clal, >95% of the DNA                                                                                    |                |
| fragments can be ligated with T4 DNA ligase in 16 hours at 16°C. Of these ligated                                                                               |                |
| fragments, >95% can be recut with Clal.                                                                                                                         |                |
| Non-Specific DNase Activity (16 Hour)                                                                                                                           | Pass           |
| A 50 µl reaction in CutSmart™ Buffer containing 1 µg of Lambda dam- DNA and a                                                                                   |                |

R0197S / Lot: 10041800
