## New England Biolabs Certificate of Analysis

| Product Name:          | Earl                                                                                                                                               |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Catalog Number:        | R0528L                                                                                                                                             |
| Concentration:         | 20,000 U/ml                                                                                                                                        |
| Unit Definition:       | One unit is defined as the amount of enzyme required to digest 1 $\mu$ g<br>Lambda DNA in 1 hour at 37°C in a total reaction volume of 50 $\mu$ l. |
| Packaging Lot Number:  | 10175012                                                                                                                                           |
| Expiration Date:       | 12/2024                                                                                                                                            |
| Storage Temperature:   | -20°C                                                                                                                                              |
| Storage Conditions:    | 300 mM NaCl, 10 mM Tris-HCl (pH 7.4), 1 mM DTT, 0.1 mM EDTA, 50%<br>Glycerol, 500 μg/ml BSA                                                        |
| Specification Version: | PS-R0528S/L v1.0                                                                                                                                   |

| Earl Component List |                       |            |                      |  |
|---------------------|-----------------------|------------|----------------------|--|
| NEB Part Number     | Component Description | Lot Number | Individual QC Result |  |
| R0528LVIAL          | Earl                  | 10175011   | Pass                 |  |
| B6004SVIAL          | rCutSmart™ Buffer     | 10173661   | Pass                 |  |

| Assay Name/Specification                                                                                                                                                                                                                                                                                      | Lot # 10175012 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Exonuclease Activity (Radioactivity Release)<br>A 50 µl reaction in CutSmart <sup>™</sup> Buffer containing 1 µg of a mixture of single and<br>double-stranded [ <sup>3</sup> H] E. coli DNA and a minimum of 60 units of Earl incubated for 4<br>hours at 37°C releases <0.1% of the total radioactivity.    | Pass           |
| Non-Specific DNase Activity (16 Hour)<br>A 50 µl reaction in CutSmart <sup>™</sup> Buffer containing 1 µg of Lambda DNA and a minimum of<br>60 Units of Earl incubated for 16 hours at 37°C results in a DNA pattern free of<br>detectable nuclease degradation as determined by agarose gel electrophoresis. | Pass           |
| <b>Ligation and Recutting (Terminal Integrity)</b><br>After a 10-fold over-digestion of Lambda DNA with Earl, ~75% of the DNA fragments<br>can be ligated with T4 DNA ligase in 16 hours at 16°C. Of these ligated fragments,<br>~75% can be recut with Earl.                                                 | Pass           |

This product has been tested and shown to be in compliance with all specifications.
