Functional Testing (EpiMark® Bisulfite Conversion Kit) HeLa DNA was converted and purified using the Epimark® Bisulfite Conversion Kit as described in the manual. The bisulfite-converted DNA was confirmed by PCR with bisulfite specific primers resulting in both 320 bp and 227 bp products. The efficiency of bisulfite conversion is >99% as determined by cloning and sequencing of both PCR products.	Pass
* Individual Product Component Note Standard Quality Control Tests are performed for each component included in EpiMark® Bisulfite Conversion Kit and meet the designated specifications.	Pass

This product has been tested and shown to be in compliance with all specifications.
