## New England Biolabs Certificate of Analysis

| Product Name:          | Ribonucleotide Solution Mix      |
|------------------------|----------------------------------|
| Catalog Number:        | N0466L                           |
| Concentration:         | 25 mM                            |
| Lot Number:            | 10052784                         |
| Expiration Date:       | 03/2021                          |
| Storage Temperature:   | -20°C                            |
| Storage Conditions:    | Supplied as Sodium salts, pH 7.5 |
| Specification Version: | PS-N0466S/L v1.0                 |

| Ribonucleotide Solution Mix Component List |                             |            |                      |  |
|--|-----------------------------|------------|----------------------|--|
| NEB Part Number                            | Component Description       | Lot Number | Individual QC Result |  |
| N0466SVIAL                                 | Ribonucleotide Solution Mix | 10039112   | Pass                 |  |

| Assay Name/Specification   | Lot # 10052784 |
|--|----------------|
| Endonuclease Activity (Nicking)  | Pass           |
| A 50 µl reaction in NEBuffer 4 containing 1 µg of supercoiled PhiX174 DNA and a minimum of 500 nmol of Ribonucleotide Solution Mix incubated for 16 hours at 37°C      |                |
| results in <10% conversion to the nicked form as determined by agarose gel electrophoresis.  |                |
| Functional Testing (High Yield RNA Synthesis)  | Pass           |
| A 20 µl reaction in transcription reaction buffer containing 1 µg FLuc Control<br>Template, 2 µl T7 RNA Polymerase Mix, and 10 mM ribonucleotides (each) incubated for |                |
| 2 hours at 37°C yields $\geq$ 150 µg RNA transcript.   |                |
| RNase Activity (Extended Digestion)  | Pass           |
| A 10 µl reaction in NEBuffer 4 containing 40 ng of a 300 base single-stranded RNA  |                |
| and a minimum of 100 nmol of Ribonucleotide Solution Mix is incubated at 37°C. After   |                |
| incubation for 16 hours, >90% of the substrate RNA remains intact as determined by   |                |
| gel electrophoresis using gel electrophoresis.   |                |

This product has been tested and shown to be in compliance with all specifications.
