

New England Biolabs Certificate of Analysis

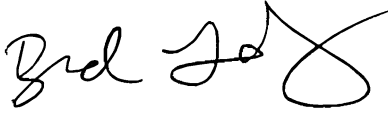

Product Name: Amylose Magnetic Beads
Catalog Number: E8035S
Concentration: 10 mg/ml
Packaging Lot Number: 10237431
Expiration Date: 03/2027
Storage Temperature: 4°C
Storage Conditions: 20% Ethanol
Specification Version: PS-E8035S v1.0

Amylose Magnetic Beads Component List			
NEB Part Number	Component Description	Lot Number	Individual QC Result
E8035SVIAL	Amylose Magnetic Beads	10222143	Pass

Assay Name/Specification	Lot # 10237431
<p>Binding Capacity (Magnetic Beads) Amylose Magnetic Beads (1 mg) were equilibrated and incubated with 500 µl of crude extract from E. coli containing a plasmid that expresses a MBP5*-paramyosinΔSal fusion protein for 2 hours at 25°C, then washed and the MBP5*-paramyosinΔSal fusion protein eluted. Binding capacity was determined to be >10 µg of target protein per mg of beads.</p>	Pass
<p>Functional Binding Assay (Qualitative) Amylose Magnetic Beads (1 mg) were equilibrated and incubated with 500 µl of crude extract from E. coli containing a plasmid that expresses a MBP5*-paramyosinΔSal fusion protein for 2 hours at 25°C, then washed, eluted and evaluated by SDS-PAGE to confirm low non-specific binding of extract proteins and high isolation of target.</p>	Pass

This product has been tested and shown to be in compliance with all specifications.
