

New England Biolabs Certificate of Analysis

Product Name: Monarch Plasmid Neutralization Buffer (B3)
 Catalog Number: T1013L
 Concentration: 1 X Concentrate
 Lot Number: 10029797
 Expiration Date: 04/2021
 Storage Temperature: 25°C
 Specification Version: PS-T1013L v1.0

Assay Name/Specification	Lot # 10029797
Functional Testing (Plasmid Purification and Restriction Digestion) pUC19 plasmid is purified from 8 NEB10-Beta samples using the Monarch [®] Plasmid Miniprep Kit and digested with XmnI resulting in ≥90% conversion to a linearized fragment and no visible gDNA or RNA observed by gel electrophoresis in ≥75% of the samples.	Pass

This product has been tested and shown to be in compliance with all specifications.
